*The Medical Services Prior Authorization *Web Page Display Date* mirrors the *Effective Date* for all Medical Services prior to July 1, 2024.

Medical Prescription Drugs requiring a BCBSMS Prior Authorization may be found at [here](#).

Medical Prescription Drugs requiring a State Health Plan Prior Authorization may be found [here](#).

Prescription Drugs requiring a Prior Authorization are Member/Benefit Plan specific and requires the Member/Patient's name and ID to start the search. The Member may search in myBlue Member, the Network Provider may search in myBlue Provider and Non-Network Providers may search [here](#).

Covered Inpatient Services are not addressed through a prior authorization process but rather through coordination of care. The Hospital's professional Providers and staff together with BCBSMS' Clinical Team coordinate the Member's Inpatient care through development and facilitation of the Member's Plan of Care. The Plan of Care includes coordination of Utilization Management needs and Discharge Planning to include continued stay evaluation and post-discharge services such as home health and home infusion. Coverage of Inpatient Services is evaluated and managed through the Hospital's available medical records and related Plan of Care.
